

Free Dental Exam

Your pet's mouth is the gateway to his entire body, and if his mouth is unhealthy the rest of his body will be, too. Plaque and tartar buildup lead to gingivitis and periodontal disease, which leads to infection in the mouth. Infected (abscessed) teeth allow bacteria from the mouth to seed into the bloodstream and can end up in the liver, kidneys, and heart valves causing organ dysfunction. Because we believe that dental health is vital to health in general, Redwood Veterinary Hospital provides FREE dental exams on dogs and cats. The doctor can then give you a treatment plan based on your individual pet's dental needs. If you schedule an anesthetic dental procedure (cleaning/polishing/extractions) within 30 days of your estimate, you will receive 10% off all dental related items. Sorry, this offer is not valid with any other offers.
